AKNOWLEDGEMENT

The Food, Medicine and Healthcare Administration and Control Authority of Ethiopia (EFMHACA) would like to extend its gratitude to the World Health Organization (WHO) for its technical assistance, meeting all financial expenses associated with consultative workshops and printing of the List of Medicines for Drug Shop. The Authority would like to give special acknowledgement to the National Drug Advisory Committee and all participants of the consultative workshops for their invaluable contributions in scrutinizing and finalizing this list. Last but not least, the Authority would also like to thank Management Sciences for Health/Strengthening Pharmaceutical Systems (MSH/SPS) for its technical support in revising this list.
FORWARD

Pharmacotherapy has always been an integral part of healthcare system and will remain so in the future. This relies on the availability of safe, effective and affordable medicines with the required quality, in reasonable amount. Moreover, on the rational prescribing, dispensing and use of such medicines. Ethiopian drug policy ensures that medicines which are required for prevention, diagnosis, treatment, mitigation and rehabilitation of diseases affecting the majority of Ethiopian people have to be identified and classified to respective levels of health service delivery.

The List of Medicines for Drug Shop is hereby revised for the fourth time in light of the above principle and the latest developments in fields of medicine and pharmacy and considering the availability of pharmacy professionals. The presentation of the list alone does not solve country’s problem in distribution, dispensing and use of drugs unless all the concerned bodies commit themselves to its full implementation. Therefore, all concerned professionals and organization are requested for distribution and dispensing of all drugs included in this list at the level of Drug Shop and hence, users of this medicines list are advised to refer to the list whenever they provide the services in different Drug Shops.

It gives me a great pleasure to introduce this edition of the list to all beneficiaries, which is the fruit of the joint effort of the staff of the Authority, the National Drug Advisory Committee, development partners as well as the participants of the review workshops. I hope that the List of Medicine for Drug Shop will serve as useful guides for the procurement and distribution as well as to increase availability of medicine in the Drug Shop.

Finally, I would like to express my gratitude to all those who have directly or indirectly extended their helping hands in the revising and printing of the list. I also call upon health professionals and interested parties to continue their usual support in updating the list by forwarding comments and suggestions to the Food, Medicine and Healthcare Administration and Control Authority of Ethiopia.

Yehulu Denekew Alemneh, Director General,
Ethiopian Food, Medicines & Healthcare Administration & Control Authority (EFMHACA)
INTRODUCTION

It is by far known that medicines are integral components of a healthcare system. Although there are immense active pharmaceutical entities in the global market, limiting medicines that shall be used within a given health institution in accordance with the availability of professionals is advantageous for proper management of medicine within a facility. This is done with due regard to factors like; safety, efficacy, quality, cost-benefit ratio, sufficient experience with the medicines and other factors. Pharmacotherapeutic classification of medicines was utilized to categorize medicines for the Drug Shop.

The fourth edition of the List of Medicines for Drug Shop is now revised in light of the latest development in the fields of medicine and pharmacy. Besides to this the Authority included some of medicine which was requested to be included in the third edition. As customary, the purpose of the fourth edition of List of Medicine for Drug Shop is to provide up-to-date list of medicine for the Drug Shop, to improve procurement, to increase availability and to promote proper use of Medicines.

The draft of the revised edition was first prepared by the Authority using a technical working group composed of different health professionals and then enriched through national consultative workshops. Participants involved in the workshops were specialists, health professionals from various disciplines, representatives of teaching institutions, professional associations, regional health bureaus, relevant departments of Ministry of Health, pharmaceutical manufacturers & importers, government hospitals and other related organizations. Soon after, the revised version of List of Medicine for Drug Shop was finalized by the Authority.

In the course of reviewing the previous edition, medicines which are obsolete, less effective, with low benefit to risk ratio and superseded by better ones have been deleted while medicines with better quality, safety and efficacy profile have been included. Except for the addition of some new categories, the pharmacotherapeutic classification system that was used in the previous edition is still maintained. Since the process of revising Drug Shop list of Medicines is a continuous process which takes into accounts change priorities for public health actions, epidemiological conditions as well as progress in pharmacological and pharmaceutical findings, this list will be subjected to continuous revision. Consequently, all users of this list are strongly invited to send their comments and suggestions to the Food, Medicine and Healthcare Administration and Control Authority of Ethiopia, P.O. Box 5681, Tel: 251-11 552 41 22, Email: regulatory@fmhaca.gov.et, web site: www.fmhaca.gov.et Addis Ababa, Ethiopia.
